

# Test Your Home Safety Knowledge | Quick Quiz

*Can you identify the safety risk in each situation?*

## Situation 1: What's the safety risk in this bathroom set up?

Answer: **Only one light fixture.** In the event the bulb burned out, the bathroom would be very dark. The only electrical outlet is high and hard to reach and is not a GFCI (ground fault circuit interrupter) outlet.

## Situation 2: What's the safety risk in this patio and walkway?

Answer: It's a nice patio and walkway, but **uneven flagstone creates a tripping hazard.**

## Situation 3: What's the safety risk in this stovetop?

Answer: **Stove/oven knobs are on the back of the stove/oven increasing risk of injury by reaching over a hot surface to turn off.** Knobs on the front are a much safer and convenient option.

## Bonus Round: What else is a safety risk in this kitchen set up?

Answer: **Drawer pulls are round knobs.** Consider replacing them with D-shaped pulls for easier use.
